VIRTUAL CIO SERVICES DESIGNED FOR
SMALL BUSINESS

ABOUT US

Deco Networks is a boutique information technology firm which utilizes a network of consulting IT professionals to provide personalized superior service at an affordable cost. Our members bring together a collective set of tools and knowledge from the technology industry allowing DecoNetworks to offer a wide variety of services and expertise to small businesses, cultural, and not-for-profit institutions.

We take great pride in our professionalism and work ethic, and you can feel safe putting your trust and confidence in us that we will always be honest and fair in our relationships with our clients.

Having high ethical standards is not an option, it's how we do business.

INDUSTRY-LEADING 3rd-PARTY VENDORS

Integrated Technology Solutions

Virtual CIO Services designed for Small Business

Starting at a low
monthly fee of **\$75**/User

PROACTIVE SUPPORT

An integral component of ITS Plans, proactive maintenance is performed each month for all servers, workstations, and various network devices. This service helps to limit potential downtime while increasing productivity. All computers will receive managed anti-virus and monitoring software allowing for 24x7 monitoring.

Value-Added Bonus: For every five users covered under the plan, 1hr/mnth of included remote support will be provided at no additional charge. (\$75 value, minimum of at least three computers required).

AFFORDABLE & CONTROLLED COSTS

A key benefit to clients participating in this program is the ability to control their IT costs by locking-in lower rates for both on-site and remote service calls, all while spreading out their expenses over a year's time. While our off-contract, on-site rates start around \$150/hr, those clients enrolled in our program will receive the same level of service for \$100/hr. In-program remote-access rates are \$75/hr.

CUSTOM SOLUTIONS

With years of IT experience, across a wide-variety of industries, DecoNetworks can easily bring together cloud service providers to customize a solution that best fits your business needs.

REMOTE SUPPORT

By utilizing Citrix software, we provide full remote support in effort to resolve a variety of issues. This same technology allows us to check-in at least once a month to make sure your systems are running at their optimal level.

CLOUD-BASED SOLUTIONS

Through partnerships with Google & Rackspace, DecoNetworks provides our clients with secure cloud-based e-mail and file storage solutions. Initial account cost per user included as part of plan. Spam & Virus filtering included.
